## System Requirements For Apex Apple TV Video Converter:

NOTE: Pong-Pong is an emulation of Pong, but still it requires minimum hardware (or rather, a well-functioning emulation) and a fair amount of time. The controller needed is for classic arcade pong, you can't get away from that as it's the very basis of the game. I've installed Pong-Pong on every kind of computer, and I never had problems with the game. But this is a recommendation, if you're not used to installing and configuring software and hardware on computers, then please try it
